

Making People, Premises, Processes Safer

Eurofins SAFER@WORK™ is your end-to-end COVID safety service provider. Let's fly again.

The airline industry connects everything that matters most—our families, homes, and food logistics; our businesses and governments. The next normal depends critically on our safe return to flight.

As a world leader in the provision of clinical diagnostics, forensic, pharmaceutical, food and environmental laboratory testing services, Eurofins is uniquely positioned to provide comprehensive, fast, reliable, customized COVID-19 testing, monitoring, and consultation solutions for virtually any industry, around the globe.

PASSENGER AND STAFF PCR, ANTIGEN, AND ANTIBODY

Pre-flight or on site, departure and arrival—we deliver fast, accurate testing solutions. And we can identify newly emerging strains.

WORN MASK TESTING Non-invasive, reliable testing method for identifying infected personnel.

SURFACE TESTING Gain and maintain confidence that your site's cleaning and decontamination methods are consistent and effective.

AIR TESTING Tests for SARS-CoV-2 presence and measures viral load in enclosed spaces.

SITE WASTEWATER TESTING Early, noninvasive indication of an outbreak on site so you can act fast to isolate and test infected people before symptoms appear.

And it's more than clinical and environmental testing.

Eurofins **CONSULTATION SERVICES** incorporates CDC/WHO guidelines and the unique end-to-end logistics of each airport to deliver

- personnel protection measures
- staff and crew training
- enhanced cleaning and disinfection
- passenger traffic flow organization
- sampling procedures assessment
- air quality and filtration
- corrective action plans

 **eurofins is Testing for Life.**
